Press Office, Europe Books,  
evaluation@europebooks.co.uk

### Benefits of acquiring the book

After purchasing and reading this book, readers will:

1. Know the profile of a highly successful couple. By discussing the twelve mandatory competences for success, couples will discover what competences they need to possess or develop for a durable relationship and how to do it.
2. Maximize possibility for a durable relationship by moving from couples dependent on intuition to couples with research-based know-how. Couples will not be flying blind and ending up in relationship disasters.
3. Experience the marriage/relationship they have always dreamed of and increase both their relationship satisfaction and their commitment. Commitment will make sense because they have the “I got this feeling” as they will know exactly what went wrong by consulting the provided roadmap.
4. Know what to do when they don't want a divorce. How to “vaccinate” their relationship against divorce and how to improve a relationship that seems un-improvable and experience a relationship makeover.
5. Be capable of avoiding classical mistakes and manage competently:
  - a. Phases that marriages and relationships undergo
  - b. Gender differences
  - c. Fading passion
  - d. Personality and temperament differences
  - e. Finances, sexuality and so forth

6. Single people will be saving their marriage before it even starts in a time when divorce rates (figuratively speaking) are resisting scientific attempts and therapist prescriptions.

7. Second marriages will not only increase but assure their chances for success because this book content covers or “checks” all the boxes on the list of conditions for durable and long-lasting marriages.

In sum, readers will increase their Relationship Intelligence significantly, stabilizing their relationship growth experience and general satisfaction.
